

I suffer from severe daily migraines, which is why we are on the no-call lists (both WI & national). Please do not allow people to constantly call my home and harass us with calls, as this only causes me even more agony and pain. Even my family and friends know not to call me - therefore we should have say in strangers calling our home. We have to leave the phone on due to doctors calling, and family members having medical problems, etc.. End the telemarketers, PLEASE!!!!
